Avoid unnecessarily large images

Explanation

Serving images that are too large leads to slower requests and wasted bandwidth. [Learn More](#).

Assessment

Found 3 oversized images with a total savings potential of 694 KB.

Advice

Use responsive images that are appropriately sized for the user's device.

LCP Subparts Request Stats

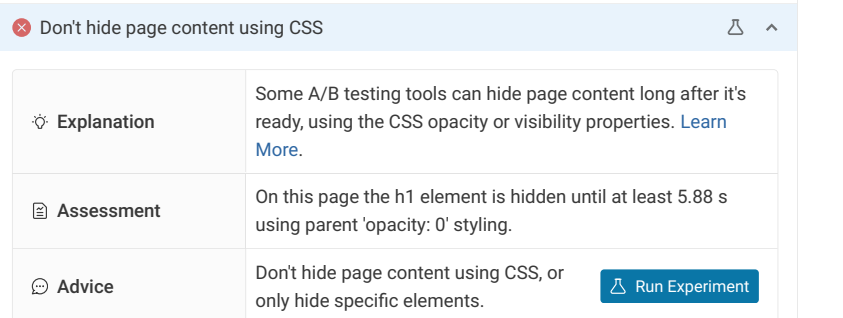

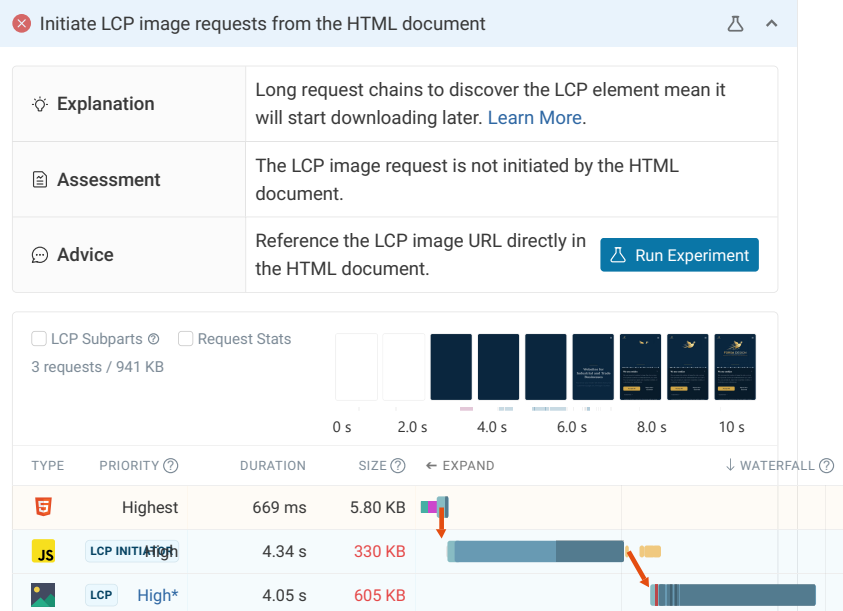

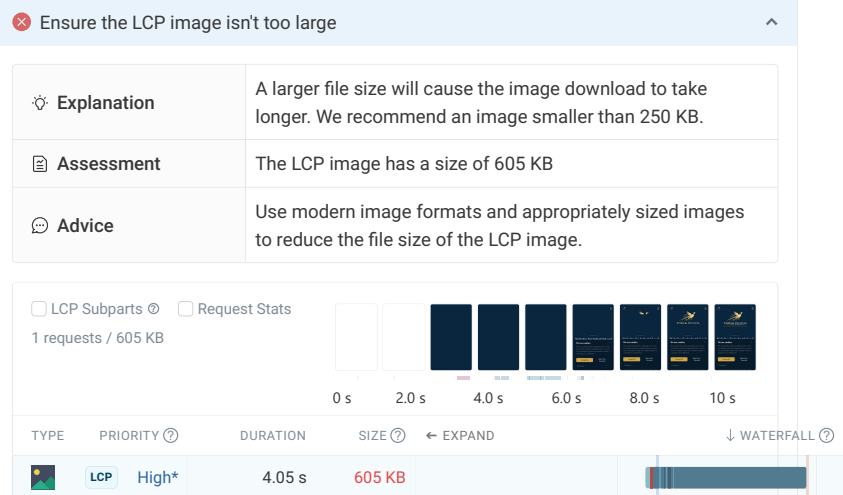

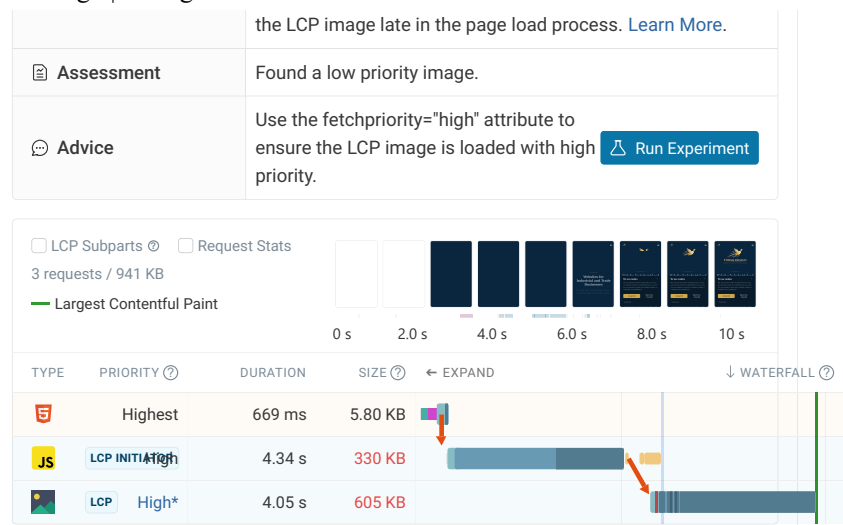

3 requests / 715 KB

TYPE	DURATION	SAVINGS	SIZE	EXPAND	WATERFALL
	1.20 s	19.9 KB	20.5 KB		
	1.30 s	87.1 KB	88.7 KB		
LCP	4.05 s	587 KB	605 KB		

Ensure LCP image is loaded with high priority

Explanation

Sometimes the browser only discovers the importance of

Timeline

Page H1 content was hidden using CSS until at least 5.88 s.

✖ Ensure resource hints are valid

🔧 Explanation

Browser resource hints tell the browser about resources before they would be naturally discovered. [Learn More](#).

📄 Assessment

Found 1 potentially invalid resource hints.

💡 Advice

Ensure that resource hints are valid and used correctly.

RESOURCE HINT	SOURCE	TYPE	SIZE
✔ https://fonts.googleapis.com	DOM	PRECONNECT	
✔ https://fonts.gstatic.com	CROSSORIGIN	PRECONNECT	
✔ https://fonts.googleapis.com	HEADERS	PRECONNECT	
✔ Preloading is not excessive: found 1 preloa...		PRELOAD	46.1 KB
✖ /logo-new-lg.webp	AS="IMAGE"	PRELOAD	46.1 KB

⚠ Use modern image formats

⚠ Avoid large amounts of CPU processing

⚠ Avoid forced reflows

ℹ Create required server connections proactively

✔ Lazy load offscreen images

✔ Ensure iframe content doesn't cause poor LCP

✔ Avoid render-blocking CSS @import chains

✔ Reduce server response time

✔ Reduce HTML download size

✔ Minify CSS and JavaScript

✔ Avoid large CSS files

✔ Reduce render-blocking resources

✔ Ensure the server responds quickly to requests for static resources

✔ Don't lazy load LCP images

✔ Ensure LCP image appears soon after loading

✔ Use HTTP/2 or higher

✔ Don't preload too many fonts

✔ Don't load oversized web fonts

✔ Avoid excessive resource preloading

✔ Avoid preloading async/defer resources

✔ Avoid marking too many requests as high priority

✔ Compress text files

✔ Use TLS 1.3 instead of TLS 1.2

✔ Avoid larger re-renders of existing content
