PASSED AUDITS (20)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ▼

These are opportunities to improve the legibility of your content.

NAVIGATION

- ▲ Heading elements are not in a sequentially-descending order ▼

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

[Show](#)

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on

ADDITIONAL ITEMS TO MANUALLY CHECK (1)

Hide

- ☐ Structured data is valid

Run these additional validators on your site to check additional SEO best practices.

PASSED AUDITS (10)

Hide

- ☒ Page isn't blocked from indexing
- ☒ Document has a `<title>` element
- ☒ Document has a meta description
- ☒ Page has successful HTTP status code
- ☒ Links have descriptive text
- ☒ Links are crawlable
- ☒ robots.txt is valid
- ☒ Image elements have `[alt]` attributes
- ☒ Document has a valid `hreflang`
- ☒ Document has a valid `rel=canonical`

☒ 3/3

Agentic Browsing

These checks ensure high-quality, [browsable websites for AI agents](#) and validate the correctness of WebMCP integrations. This category is still under development and subject to change.

WEBMCP

WebMCP tools registered

Lists the [WebMCP tools](#) registered at the time of analysis. Unscored

Audits validating WebMCP integration.
